

Captain James A. Lovell
Federal Health Care Center

2014 Annual Mental Health Summit

The purpose of the summit is to enhance mental health care and well-being of Veterans, Active Duty, and their families/dependents through an enhanced collaboration between the FHCC and our community partners. Our goal is to engage in an active dialogue so that we, as a community, can address the mental health care needs of those we serve.

Objectives of the summit include:

- To expand the breadth of mental health services by identifying and seeking solutions to gaps in care
- To enhance communication between the FHCC and community-based mental health providers
- To enrich an understanding of military cultural competence
- To promote community inclusion for all persons served
- To develop a community-based resource guide

Tuesday, August 19, 2014
